

Excel Week 2 Assessment Brief

Course: Data Analysis with Excel

Overview: This assessment will test your understanding of key concepts from Week 2 of the Excel course. It covers intermediate functions for data analysis, lookup and reference functions, working with Excel Tables, cleaning messy data with text functions, and applying conditional formatting. The questions are designed to challenge your recall, understanding, and ability to apply what you've learned.

What You'll Be Assessed On:

- Using IF, nested IF, IFS, and AND/OR logic to make decisions in your data
 - Applying COUNTIFS, SUMIFS, and AVERAGEIFS to summarize data based on multiple conditions
 - Looking up and retrieving data using VLOOKUP, INDEX and MATCH, and XLOOKUP across related tables
 - Converting ranges into Excel Tables and working with structured references and the Total Row
 - Cleaning messy data using TRIM, LEFT, RIGHT, MID, SUBSTITUTE, VALUE, and TEXTSPLIT
 - Applying conditional formatting rules, including formula-based rules, to highlight patterns in data
-

Instructions:

- You are expected to complete this assessment individually.
 - Carefully read each question before selecting your answer.
 - Submit your responses only once through the form below.
